Rebar cutting machine

GQ40

Easy to operate: The operation is simple and easy to control, and the operator can quickly get started even without excessive mechanical operation experience.
Compact structure: The body design is compact, easy to move and store, equipped with walking wheels for more convenient transfer.
High cutting accuracy: The cutting accuracy is usually within ± 2mm, ensuring the quality of steel bar processing.
Wide applicability: Suitable for cutting various types of steel bars, including ordinary carbon steel, round steel, deformed steel, etc.
Strong durability: The pure copper motor, thickened blade body, and forged gears ensure the durability and stability of the equipment.

Model	GQ40
Motor power	3KW
Input voltage	Three-phase 380VAC
Power speed	2800r/min
Cutting speed	32 times/min
Cutting range	Round bar 4-32mm, Deformed bar 4-
Blade size	28mm 83*83*26mm
Oil type	Gear oil
Add gear oil weight	8-10kg
N.W.	315kg
G.W.	335kg
Overall dimenisons	1320*450*770mm
Packing dimensions	1420*500*820mm

Pure copper motor:
Provides stable power output, is heat resistant, cools quickly, and enhances durability by being overload resistant.

Quenched and forged gears
High strength special grade steel, Diagonal tooth design, silent operation

Thickened forged cutting blade:
Features a curved cutting blade design that is sharp and wear-resistant, resulting in a smooth cutting surface, and can cut multiple rebar at once.

Clutch operating lever:
Comes with a dual-purpose operating lever for manual or foot control, making cutting convenient and operation simple.

Rebar cutting machine

Model	GQ50
Motor power	4KW
Input voltage	Three-phase 380VAC
Power speed	2800r/min
Cutting speed	28 times/min
Cutting range	Round bar 4-40mm, Deformed bar 4-
Blade size	36mm 90*90*26mm
Oil type	Gear oil
Add gear oil weight	10-12kg
N.W.	470kg
G.W.	490kg
Overall dimenisons	1470*550*820mm
Packing dimensions	1570*600*870mm
